PHE Champions:
Local Leaders for the World

“Family planning and having a planned family decrease pressure to the environment and somehow it gives the environment the time to breathe”… Jojo Delima, Coastal Resource Management Officer, Ubay, Bohol
South to South Exchange—PFPI organized and conducted a population-health-environment (PHE) learning exchange for local executives and leaders of government and non-governmental organizations in Tanzania, Ghana, Ethiopia, Indonesia, Kenya, Philippines and the United States to the Municipalities of Ubay and Talibon located in the Danajon Bay, the only Double Barrier Reef in the Philippines and one of only three such double barrier reefs in the Indo-Pacific (Pichon, 1977). Both municipalities were former project sites of the Integrated Population and Coastal Resource Management (IPOPCORM) Initiative. Following the project’s completion in 2006, the local governments and communities have sustained the PHE approach and transformed their project areas into PHE Learning Sites.

PATH Foundation Philippines Inc. (PFPI) is a local, private, non-stock, non-profit corporation registered with the Philippines Securities and Exchange Commission in 1992 (SEC No. ANO 92-04380). PFPI is also registered with the U.S. Internal Revenue Service (IRS) which, in 2001, issued a Determination letter recognizing PFPI as a charitable and tax-exempt organization under Section 501 (c) (3) of the U.S. International Review code.

Mission

The Foundation’s mission is to improve health and contribute to environmentally sustainable development, particularly in under-served areas of the Philippines and other developing countries.
Capabilities

The Foundation’s multi-disciplinary core competencies include policy advocacy, training, behaviour change communication, social marketing, operations research, outreach systems development and program monitoring and evaluation. Central to the Foundation’s effort is the drive to facilitate stakeholder engagement and forge cross-sectoral partnerships with local governments, NGOs, businesses and communities to achieve our mission.

PFPI designs, implements and evaluates innovative models of community development that work primarily across the population, health and environment (PHE) sectors but sometimes encompass other disciplines such as sustainable livelihoods, alternative energy and education.

The Foundation also specializes in peer mediated behaviour change and has developed numerous training curricula, support materials and other tools to strengthen the capacity of government and non-government partners working to prevent unintended pregnancy and sexually transmitted infections, including HIV/AIDS, and to promote reproductive health, pro-environment and conservation practices.
Programs

Building Actors and Leaders for Advancing Community Excellence in Development (BALANCED) Project

BALANCED is a five-year Population, Health and Environment (PHE) technical leadership initiative supported by the USAID Office of Population and Reproductive Health. The Coastal Resources Center at the University of Rhode Island leads the project in collaboration with PFPI and Conservation International (CI). Building on a decade of USAID investments in PHE global leadership and field-based projects, BALANCED seeks to promote wider adoption and use of PHE approaches by:

- Increasing the PHE knowledge base and making information more accessible to and user-friendly for diverse and widespread audiences.
- Building the capacity of field practitioners, policymakers, decision makers and other PHE professionals to use state of the art techniques and approaches at local, regional, national and international scales.
- Fostering implementation of field-based PHE initiatives in areas of high biodiversity.
During 2010, PFPI facilitated the following progress:

• Conducted a PHE South-to-South study tour for three public and seven private (NGOs, researchers, advocates, specialists of health and conservation organizations) sector leaders from 7 countries;

• Trained and mentored 116 PHE practitioners from Asia and Africa on the key components of PHE project implementation;

• Adapted and pretested PHE training curricula and materials for use in the African context and for the broader PHE community;

• Extended technical and financial support to local NGOs in Africa for PHE integration including the Ethio-Wetlands and Natural Resource Association (EWNRA) for integration of family planning into their conservation activities; the Wildlife Conservation Society (WCS) for the development of PHE oriented goals and objectives for the Ruaha Landscape Program in Ethiopia and for integration of family planning into the Community Markets for Conservation (COMACO) program in Zambia; the Tanzania Coastal Management Partnership (TCMP) for refinement of PHE activities in Pangani District and incorporation of PHE strategies into their new Pwani Project; the Friends of Nation for integration of family planning into coastal and fisheries government activities in Ghana.
Poverty Population Environment (PPE) Project

This 2-year project (2008-2010) work with 22 local governments to expand access to PHE information and family planning services among disadvantaged communities located in three fragile ecoregions namely the Verde Island Passage, the Danajon Bank and the Mt Capotoan-Mt Cabalantian Watershed complex in Samar. In 2010, the project achieved the following:

- Sustained the activities of 355 community-based distribution (CBD) agents trained in 2009 to promote PHE concepts and distribute contraceptives to people living in remote hamlets;
- Strengthened the capacity of 114 government health personnel in Rural Health Units (RHU) to provide technical oversight, monitoring and referral services for CBD agents;
- Provided family planning services to 7,311 women and couples via the CBD mechanism;
- Trained 25 adults to serve as peer educators for PHE and family planning (cumulative total of 67 adult peer educators trained since 2009);
- Leveraged resources valued at U$296,285.00 (cash and in-kind) from local and international sources to support PPE project implementation.
NGO Initiatives to Prevent HIV/AIDS Project

Designated to reduce the spread of HIV/AIDS and Sexually Transmitted Infections (STI) among vulnerable groups living in Bohol Province, this project transferred prevention knowledge and skills to tourism sector-related workers (TSRW) and dependents of Overseas Filipino Workers (OFWs). In 2009, the project accomplished the following:

- Reached 623 Dependents of Overseas Filipino Workers and 359 Tourism Sector Related Workers with interpersonal communication and counseling interventions delivered by community outreach workers and peer educators trained under the program;
- Conducted refresher training workshops for 69 RHU personnel to further improve their capacity to deliver appropriate information and services;
- Facilitated advocacy efforts that resulted in the enactment of five legal ordinances by local councils that ensure the inclusion of HIV/AIDS related activities in the Comprehensive Development Plans (CPD) in project areas.
- Leveraged cash and in-kind contributions totaling US $ 3,347 from local government units (LGUs), private sector collaborators and communities as counterpart support for implementation of project activities.
Integrated Population and Coastal Resource Management (IPOPCORM)

During 2010 PFPI continued its effort to disseminate the findings and policy implications of IPOPCORM’s operations research study in Palawan, Philippines. A scientific paper written by the research team was selected for publication in the peer-reviewed journal of Environmental Conservation (Issue 37:4).

*Integrated management of coastal resources and human health yields added value: a comparative study in Palawan (Philippines)*

Leona D’Agnes, Heather D’Agnes, J. Brad Schwartz, Maria Lourdes Amarillo and Joan Castro
PATH Foundation Philippines Inc.

**ABSTRACT**

A quasi-experimental design was used to test the hypothesis that there will be a significant improvement in both coastal resource management (CRM) and human reproductive health (RH) outcomes by delivering these services in an integrated manner as opposed to delivering either in isolation. The CRM, RH and integrated CRM+RH interventions were tested in three island municipalities of Palawan. Pre-project (2001) and post-project (2007) measurements of dependent variables were gathered via...

PATH Foundation Philippines, Inc.
biophysical and community household surveys. Regression analyses indicate the CRM+RH intervention generated higher impacts on human and ecosystem health outcomes compared to the independent CRM and RH interventions. Improvements in coral and mangrove conditions are attributed to the effects of protective management by collaborating peoples’ organizations. The same institutions managed RH activities that enabled contraceptive access and a significant decrease in the average number of children born to women in the study area. Other trends showing a significant reduction in income-poverty among young adults infer added value. To ensure long term sustainability of CRM gains and prevent over-use of coastal resources, integrated forms of management that engage communities in the simultaneous delivery of conservation and family planning services are needed.

REPORT OF INDEPENDENT PUBLIC ACCOUNTANTS

The Board of Trustees
PATH Foundation Philippines, Inc.
5/F Unit 506, Tower II, Cityland Condominium 10
154 H.V. dela Costa Street, Salcedo Village
Makati City 1227, Philippines

We have audited the accompanying financial statements of PATH Foundation Philippines, Inc. (a Non-stock, Non-profit Organization), which comprise the statements of assets, liabilities and fund balance as of December 31, 2009 and 2008, and the related statements of receipts and expenses, changes in fund balance for the years ended, and a summary of significant accounting policies and other explanatory notes.

Management’s Responsibility for the Financial Statements
Management is responsible for the preparation and fair presentation of this financial statement in accordance with Philippine Financial Reporting Standards for Small and Medium-sized Entities. The responsibility includes: designing, implementing and maintaining internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error, selecting and applying appropriate accounting policies, and making accounting estimates that are reasonable in the circumstances.

Auditors’ Responsibility
Our responsibility is to express an opinion on the financial statements based on our audits. We conducted our audits in accordance with Philippine Standards on auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors’ judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity’s preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity’s internal control. An audit also includes evaluating the appropriateness of accounting policies used and reasonableness of accounting estimates made by the management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion
In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of PATH Foundation Philippines, Inc. (a Non-stock, Non-profit organization) as of December 31, 2009 and 2008 and the results of its financial performance and its cash flows for the years then ended in accordance with Philippine Financial Reporting Standards for Small and Medium-sized Entities.
